LE QUANG KHANH

Software Engineer

Ho Chi Minh City, Vietnam | lequangkhanh295@gmail.com | github.com/psy-zney | zney295.id.vn

SUMMARY

Information Technology student with hands-on work across backend services, web interfaces, and Windows software. Built endpoint-management and selective PC migration workflows, and contributed checkout to a team POS system. Emphasizes clear state, failure handling, tests, and release tooling.

EDUCATION

University of Economics Ho Chi Minh City (UEH) *Expected Aug 2027*
B.S. in Information Technology - Ho Chi Minh City, Vietnam

TECHNICAL PROJECTS

SentinelLAN - *Personal project* *2026*
Repository: github.com/psy-zney/SentinelLAN

- Developed an endpoint-management flow across a Windows agent, API, dashboard, and employee mobile app.
- Separated application layers; added organization isolation, role permissions, audit history, and reconnect-safe retries.

Tech stack: *C#, ASP.NET Core, Next.js, PostgreSQL, Expo*

Zney Backup and Restore - *Personal project* *2026*
Repository: github.com/psy-zney/BackupData

- Built selective PC backup and restore: package IDs support winget reinstallation, while chosen data and settings enter a .zney archive.
- Added staged restore, SHA-256 verification, and archive-path checks; packaged versioned Windows MSI releases through CI.

Tech stack: *C#, .NET 8, WPF, xUnit, WiX*

Cloud POS - *Academic team project* *Jun 2026*

- Contributed checkout, cart persistence, payment behavior, and cancellation flows to a shared team POS system.
- Diagnosed inventory query and MySQL migration failures; configured AWS resources and merged the checkout branch.

Tech stack: *Node.js, Express, React, MySQL, AWS*

SKILLS

Languages & design: C#, TypeScript, JavaScript, Go; object-oriented design, state machines.
Applications & data: ASP.NET Core, React, WPF, PostgreSQL, MySQL, REST, WebSocket.
Quality & delivery: Git, Docker, xUnit, Playwright, CI, integrity checks, Windows MSI packaging.
